

Atomic Wallet

Custody-free solution for decentralized cross-chain atomic swap

We truly believe blockchain technology is the future of financial markets. That's why we created a new platform for transparent and immutable cryptocurrency management and trading

Assets management

Atomic Wallet is a light wallet solution and works immediately after installation:

1. Receive and send over 300 assets: BTC, ETH, BCH, XMR, EOS, XRP, LTC
2. Exchange assets via Changelly or ShapeShift with floating or fixed rate
3. Track your portfolio value in different fiat currencies

Atomic swap

Atomic Swap Exchange for cross-chain swaps avoiding third-party risks:

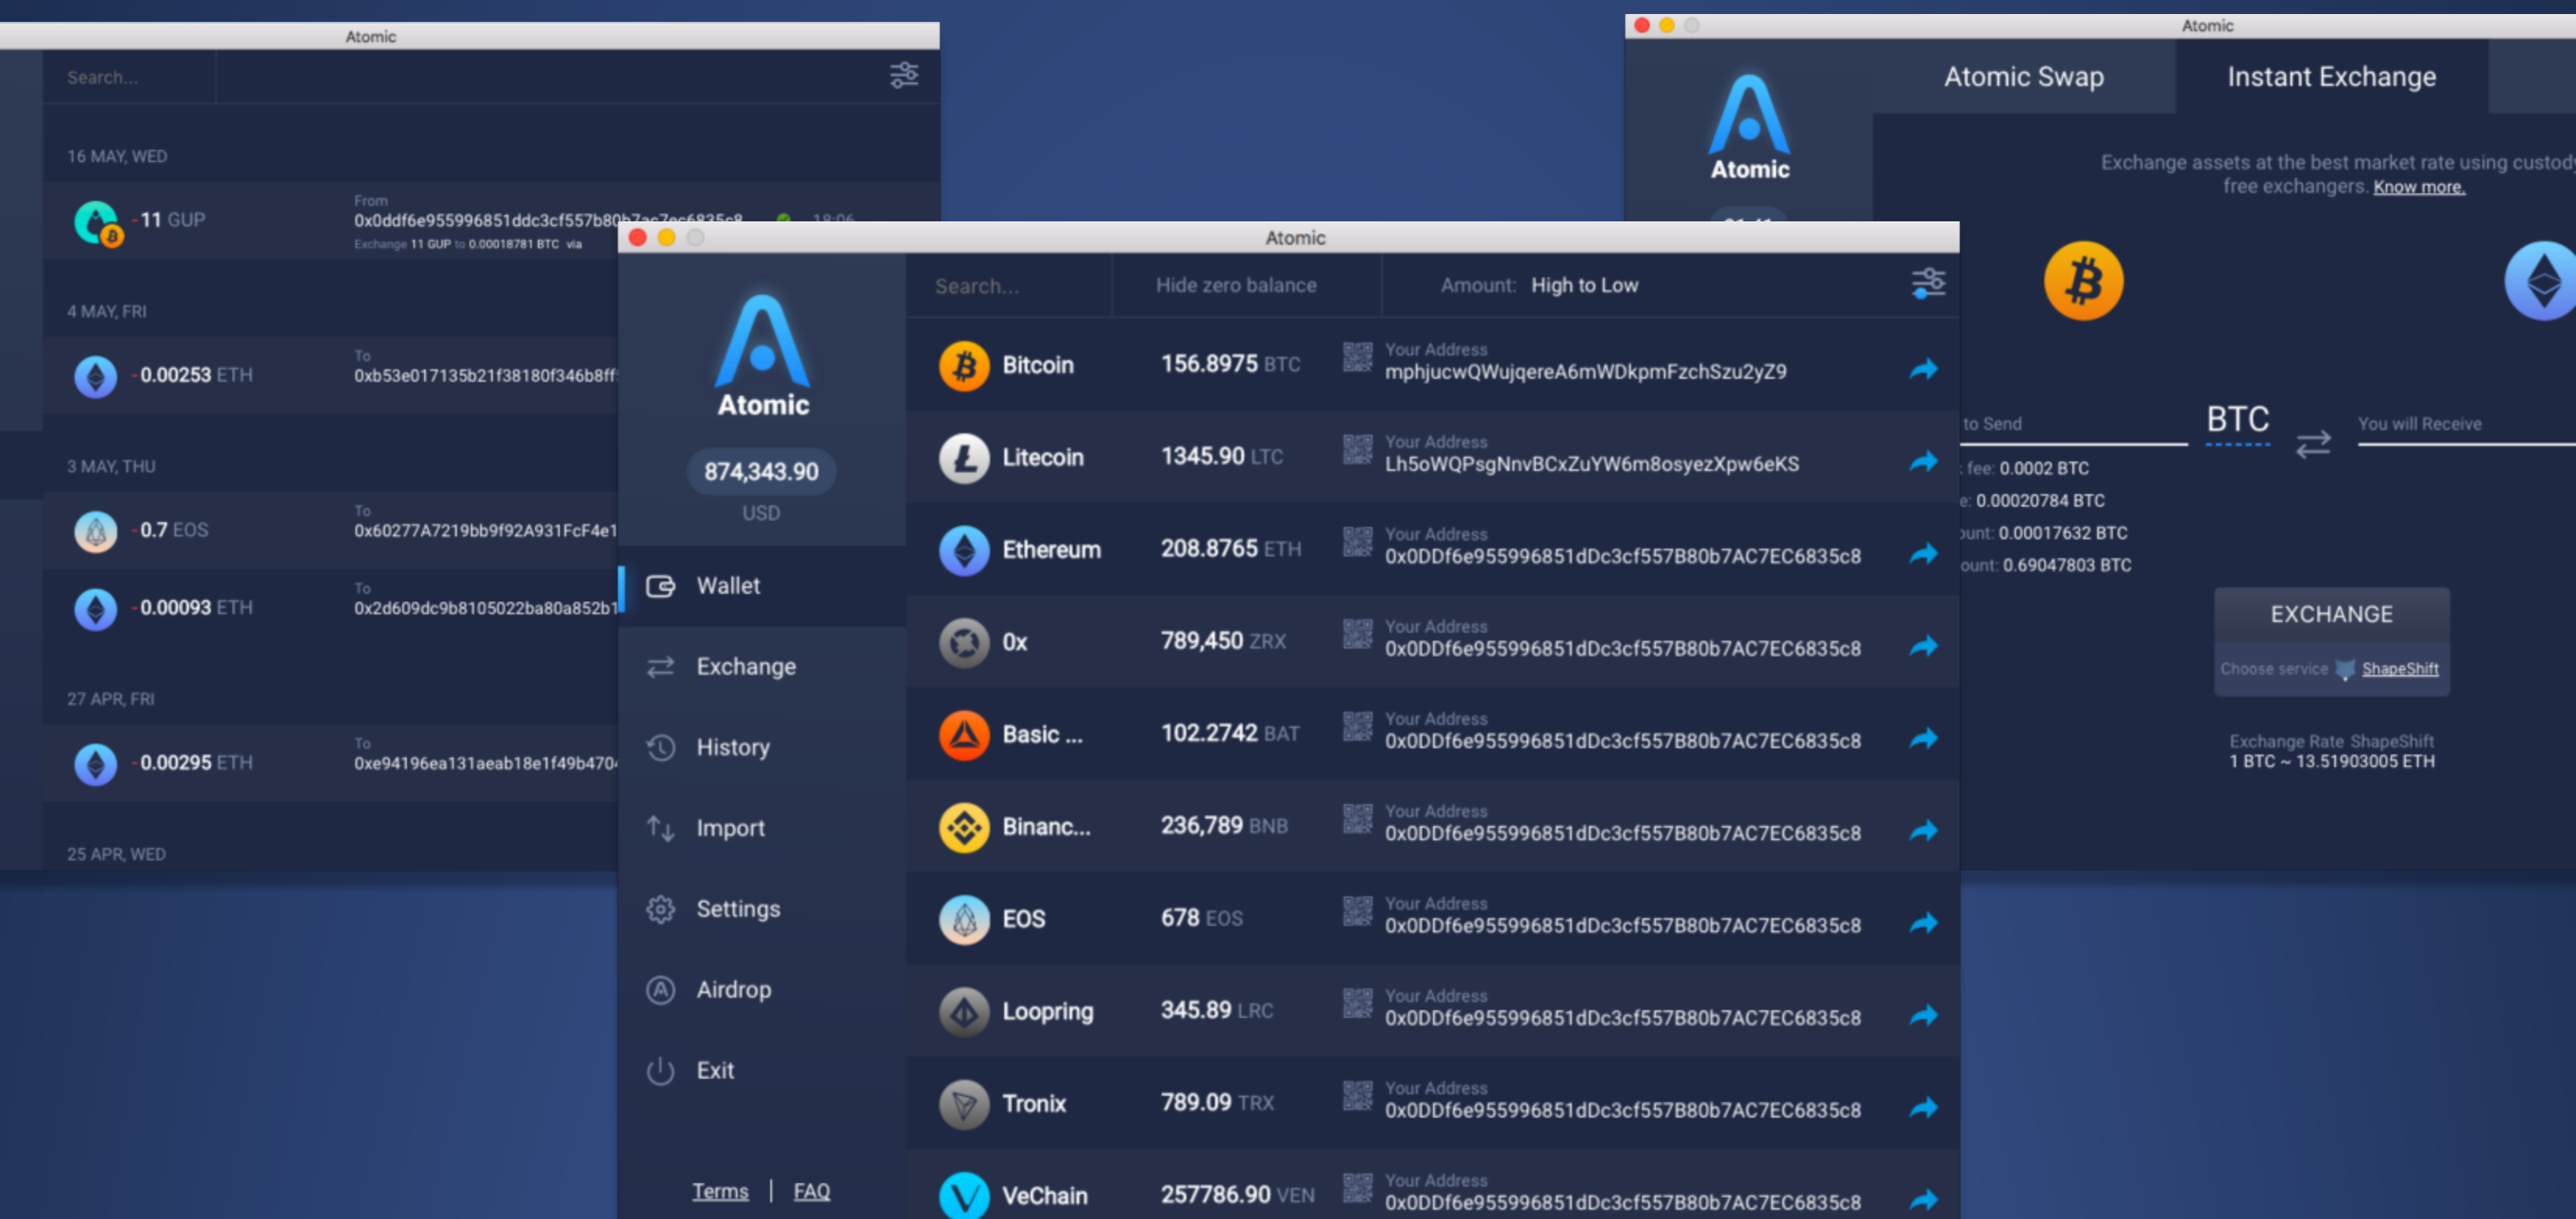

1. Blockchain-based and peer-to-peer order execution
2. Rapid and secured data transfer with Atomic Distributed Order Book
3. Distributed Order Book anti spam and fraud protection
4. Trades history blockchain storage

Migration

1. Import funds from external wallets
2. Export private keys in different formats
3. Backup wallet with 12 word phrase

Security

1. Private key storage on user device
2. Password protected
3. Strongly encrypted

Designed for most of the platforms
